DETAILED ACTION

Allowable Subject Matter

Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and system for maintaining real time communications between two clients. Each independent claim identifies the uniquely distinct features of "comparing a source IP address extracted from the internet protocol channel to the IP address assigned to the first client; if the IP address extracted from the internet protocol channel does not match the IP address identified in the session description protocol fields, providing identification of a the relay server resource to each of the first client and the second client by: sending a relay server invite message to a relay server; receiving a relay server response message, the relay server response message identifying a relay server resource, comprising a relay server IP address and port number, from a relay server; sending a redirect invite message to a redirect server, the redirect message including the identification of the second client; receiving a redirect server response message, the redirect server response message including a network address of the second proxy server serving the second client; sending a forwarding invite message to the network address of the second proxy server the forwarding invite message comprising session description protocol fields identifying the relay server resource; receiving an OK response message from the second proxy server; sending, in response to receiving the OK response from the second proxy server, a second OK

response to the first client, the second OK response comprising session description protocol fields identifying the relay server resource". The closest prior arts, Yuan (US 20040034793) and Chan et al (US 20040255156), each disclose systems for controlling real time communications between two clients, however both fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
